CREATE TRUST BUILD VALUE

MORE THAN **100 YEARS** OF COMPANY HISTORY

Tradition and innovation.

On the one hand quality, craftsmanship, attention to detail, efficiency and safety. On another research and development, redesign ability, new materials and new working methods.

Attention to market changes and customer centricity.

Construction of an industrial shed
(Varese 1934)

**AT THE CORE OF OUR WORK IS
RESPECT FOR THE INDIVIDUAL.**

We get to know our employees, collaborators, and professionals in our service well and try to value their human qualities in addition to their technical preparation and expertise in their work.

Likewise, we relate to partners and clients. In fact, we think that respect also comes through care in service, choice of quality materials, adherence to deadlines and constant comparison.

BRICK BY BRICK THE CHRONICLE OF A SUCCESS

It was 1913, Paolo Albini founded Paolo Albini Costruzioni, right at the beginning of a phase of great housing development that would continue in Varese for several decades.

In 1937, his sons Carlo and Giuseppe took over, and the company alongside residential added other areas of intervention and began to significantly expand its set of skills.

“

The speed with which changes are affecting the construction sector stimulates us to face projects with a new approach.

Alberto Castelli

”

THE NEW CHALLENGES

Search for original models of intervention with innovative methods and solutions on both the redesign and implementation fronts in a unified vision of structural, architectural, building, and plant engineering components.

“

We offer a service that is with you every step of the way. Many come to us because they have found us to be a very friendly company offering the personal touch.

Alberto Castelli

”

THE CONSTRUCTION SITE: DIGITAL CONSTRUCTION SITES

Digitization process for construction site management, control of flows and organization.
Reduction of environmental impact.
Speed in the management of work orders.

THE NUMBERS OF THE LAST 5 YEARS:

338.913 SQM DEVELOPED

30.935 NEW GREEN SQM

969 APARTMENTS

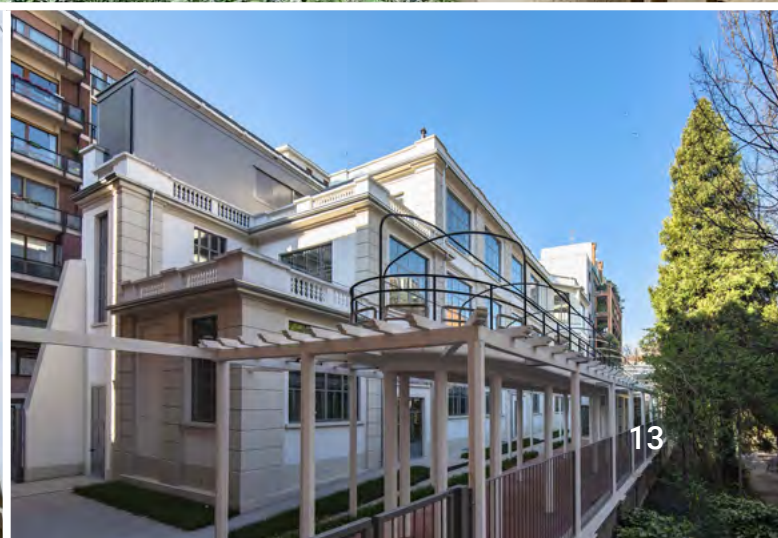

22.056 PARKING SPACES

47.240 SQM COMMERCIAL AREAS

14.400 SQM RESTORED

71.800 SQM REDEVELOPED AREAS

12.000 SQM COMMUNITY AREAS

INTERVENTION SECTORS

Each intervention has its specificities and each sector requires different skills.

We operate in residential, industrial, commercial, public and private construction and we are able to face demanding renovation works and conservative restoration.

RESIDENTIAL BUILDING

RESTORATION AND RENOVATION

INDUSTRIAL AND COMMERCIAL

COMMUNITY

RESIDENTIAL BUILDING

our projects

Integrated redesign of the construction part and the installations.

Streamlined structures and optimization of spaces, innovation of materials, casing and dry partitions.

Development of plant engineering, mechanics and home automation, centrality of energy, acoustics and ergonomic performance.

Special emphasis, attention to detail

RESTORATION AND RENOVATION

Scan to view
our projects

Respect for history and tradition.

Mastery and realization capacity, research and development of materials and construction methods.

Centrality of the client, natural willingness to listen, attention to roles.

INDUSTRIAL AND COMMERCIAL

Scan to view
our projects

Versatility and integration of construction criteria on site and/or with prefabricated building. Differentiated and modular systems.

Speed of execution, reliability of operations, quality of workmanship, punctuality of deliveries.

Operational planning, critical routes, progress control, reorganization of activities.

COMMUNITY

Scan to view
our projects

Development of the construction criteria, research of new materials and new technologies. Definition of critical areas, complexity management, innovation.

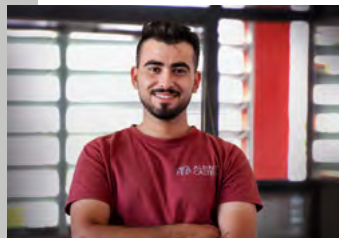

Multidisciplinary operational planning, critical paths, optimization of time frames, reorganization of operative activities. Inter-functional coordination, quality control, reliability and work efficiency.

A REALITY CONSTANTLY EVOLVING

We are fortunate to have built, over time, a valuable and close-knit group of collaborators.
